

Follow Content

Version 11

Published 2/2/2017 07:11 PM by [Anonymous User](#) Last updated 6/21/2021 08:32 PM by [Grace Kamau](#)

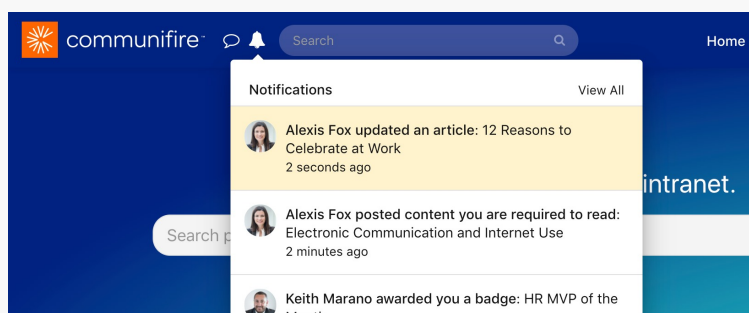

Follow content to receive notifications when the content is commented on or updated. Never miss out on important updates and conversations again. Supported content types: articles, blogs, events, files, ideas, photos and albums, videos, and wikis.

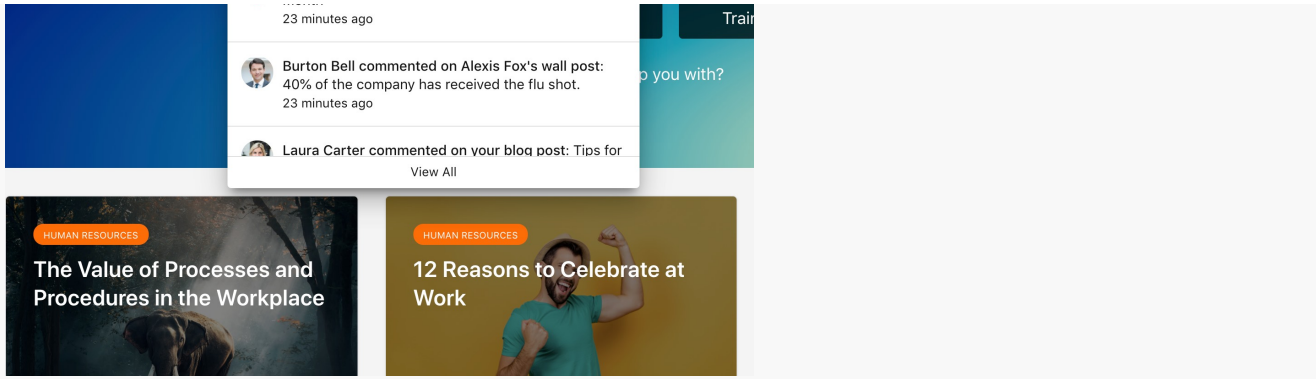

Notes:

- Authors automatically follow their content and do not see the follow button on their content.
- When you comment on content, you automatically follow the content.
- When you edit content created by another user, you automatically follow the content.

Followed Content Notification

Disable Content Updated Notification

When you edit content, you have the option to send update notifications to followers or not. Toggle the **Send update notifications to followers** setting on the edit content page.
