

Non-Member Comments

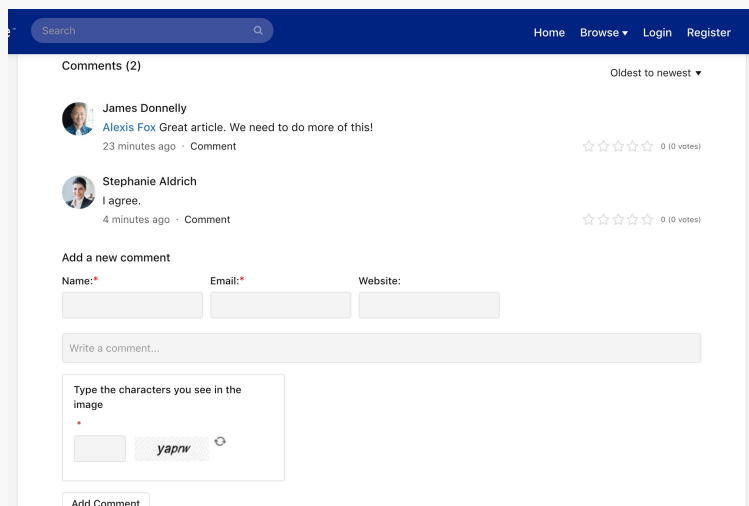

Version 10

Published 2/2/2017 07:12 PM by [Anonymous User](#) Last updated 5/11/2021 11:46 PM by [Grace Kamau](#)

Allow non-member comments (previously **Allow anonymous comments**) allows users who are not logged in to your intranet site to comment on content. They will have to provide a name and email address to comment, however they do not need an account.

Adding a comment as a non-member:

Note: If your site is set to members only in **Control Panel > System > General Settings > Site Settings > Allow access only to registered members**, the **Allow non-member comments** option will not appear. This option only appears if people are allowed to access the site without an account.
