Use these settings to include scripts on every page. You can add CSS, JavaScript, analytics, etc. This is most commonly used for including Google Analytics scripts and other 3rd party tracking software.

**Header and Footer Scripts**  
Use these settings to include scripts on every page. Most commonly used for including Google Analytics scripts and other 3rd party tracking software.

Enter header scripts Example: css, javascripts, etc. These scripts will be injected into every page, directly before the ending head tag.	<pre>&lt;link href="https://fonts.googleapis.com/css?family=Raleway" rel="stylesheet"&gt;</pre>
Enter footer scripts Example: analytics, javascripts, etc. These scripts will be injected into every page, directly before the ending body tag.	<pre>&lt;script type="text/javascript"&gt; // Makes all pages liquid</pre>

- Header scripts will be injected into every page, directly before the ending head tag.
- Footer scripts will be injected into every page, directly before the ending body tag.
