

Edit Localized Content: Replace or Change Static Text

Version 14

Published 4/3/2017 03:22 AM by [Anonymous User](#) Last updated 6/30/2021 08:37 PM by [Grace Kamau](#)

Localized Content allows you to translate or replace static text used in the Communifire user interface with the text of your choice. You can change the default terminology used in the user interface to match the terminology that best suits your company or organization. For example, you might change *Spaces* to *Teams*, *Connections* to *Friends*, or *People* to *Co-workers*.
