

# ADA Compliance

Version 6

Published 4/21/2017 09:33 PM by [Anonymous User](#) Last updated 5/11/2021 11:32 PM by [Grace Kamau](#)

The Department of Justice (DOJ) published the Americans with Disabilities Act (ADA) Standards for Accessible Design in September 2010. These standards state that all electronic and information technology must be accessible to people with disabilities.

The ADA differs from Section 508 regulations, which are an amendment to the Rehabilitation Act of 1973 and apply to all information technology, including computer hardware, software and documentation.

*"The Department is currently developing regulations specifically addressing the accessibility of goods and services offered via the web by entities covered by the ADA. The fact that the regulatory process is not yet complete in no way indicates that web services are not already covered by title III."*

## Level A Compliance : Links are provided to media players required to view content.

Criteria	Supporting Feature
Images have alternate text that can be read by screen reader software.	This feature is supported by Communifire in ADA Compliance.
Recorded video content includes captions.	Not Applicable
