

Content List Widget

Version 16

Published 4/24/2017 02:19 PM by [Matt Trujillo](#) Last updated 8/26/2019 06:00 PM by [Grace Kamau](#)

The content list widget is great for keeping everyone in your community updated on recent articles, upcoming events, key discussions, and more. Filter content by type, space, or tags to focus on specific areas. Filter by author to feature specific users' work, or filter by publication date to keep only the most relevant information visible. The content list widget is a very flexible component you can use to highlight important content throughout your intranet.

Properties

Property	Description
Title	The widget title appears at the top of the widget.
Content types	Select the content types to appear in this widget. Leave blank to include all content types. Content types can have additional options in the widget configuration. See Advanced below for more details.
Space	Select the spaces to include content from. Leave blank to include content from all spaces. Set space automatically from page will populate the widget with content from the space selected in the details pane.
Authors	Select the authors whose content will appear in the widget. Leave blank to include content by all authors.
Tags	Start typing a tag to filter the content in the widget. Leave blank to include content with any tag. Most Recent Most Viewed Most Commented Highest Rated
Sort by	Title Sort Order — Only available when Wiki is selected in the content types filter. Also filter by space, and select the parent wiki in the Advanced tab. Ascending Descending

Advanced

Field	Description
Custom CSS class	A CSS class to append to the widget.
Show Header	Check to show the widget's header, which includes the title.
Show Footer	Check to show the widget's footer.
Hide Container Border	Check to hide the widget's border.
Ignore Permissions	Check to show content regardless of whether the current user has permission to view that content.
Title char length	The number of characters in the content's title to display before appending "...".
Summary char length	The number of characters in the content's summary to display before appending "...".
Content published since	How many days, weeks, months old the content can be. This setting takes precedence over the total items setting. For example, if you set total items to 5, and content published since 1 week ago, if the 5th item was published over a week ago, it will not appear in the widget.
Custom Date Range	Check to enter a custom publication date range for content.
