

# User Profile Fields

Version 2

Published 4/16/2018 10:47 PM by [Grace Kamau](#) Last updated 4/17/2018 01:34 AM by [Grace Kamau](#)

Manage user profile fields and add your own custom fields to user profiles. You can specify various properties such as how many values are required and permitted, which roles can see the field, whether the field is searchable, whether the field requires unique values, etc.

The screenshot displays the 'User Profile Fields' management interface. At the top left, there is a navigation link 'All pages' with a back arrow. On the top right, there is an orange 'Layout' button. Below the navigation, there are three tabs: 'Details', 'Layout', and 'Widgets', with 'Widgets' being the active tab. The main content area is divided into two sections. The left section, titled 'Widgets', contains a list of widget categories: 'Built in Widgets' (with a dropdown arrow), 'Fields' (with a dropdown arrow), and 'Add New Fields' (with a right-pointing arrow). Under 'Add New Fields', there is a list of widget types: 'TextBox', 'Textarea', 'Picklist' (with a checked checkbox), 'DateTime', 'Image', 'Lookup Field', and 'Yes / No' (with a checked checkbox). The right section, titled 'Page', shows a preview of a page layout with a 'Row' header. It contains several widget instances: a 'Fixed Section', an 'Edit Rich' widget, a 'Section' widget, another 'Section' widget, and a partial 'Section' widget.
