Field type

Checkbox

Properties

Property	Description
Field label	The field label appears at the top of the field. Start typing and a list of matching text resources will appear. Select one to use or finish typing to create a new resource when the page is saved.
Number required	The minimum number of values a user is required to provide. For a checkbox, users will be required to check the field if the number required is 1.
Field type	<ul style="list-style-type: none">• Checkbox• Radio buttons

Field Help

Text to help users when completing the field.

Advanced

Field	Description
Custom CSS class	A CSS class to append to the field to apply custom styling.

Show label	Check to show the field's label.
Default value	The value pre-populated in the field if blank.

Field Options

Option	Description
Field Options	Available selections for the field.
Edit Option	Start typing and a list of matching text resources will appear. Select one to use or finish typing to create a new resource when the page is saved.
Value	Alternative value for the option. For example state abbreviation for a state option. Values are not translated. Note: For a checkbox, the value must be true or false.
Hide if empty	Check to hide the field on user profiles if it is empty.
Show alternative value	Check to show the alternative value instead of the primary value (i.e. the "Value" field for the field options) on user profiles.
Hide if default	Check to hide the field on user profiles if it contains the default value.
