REST API: Add Featured Image

Version 6

Published 5/1/2018 08:41 PM by Grace Kamau Last updated 10/8/2020 10:23 PM by Grace Kamau

Add Featured Image

POST /api/content/{ContentID}/image

Set the featured image for content. Valid for Communifire version 6.0 and above.

Method Details

HTTP Method
POST
Response Format
JSON
Requires Authentication?
YES
Product Version
6.0 and above

Required Parameters	How to use	Description
API Key	Used in the request URL: &Token=x OR Set in header: request.Headers.Add(Rest-Api-Key, x)	Communifire REST API key for the Communifire portal you are making the call for.
Image Stream	Used in the request body	Here you have to send the byte stream of the image you want to set as the featured image.
ContentID	Used in the request URL as a path parameter	Unique identifier for the content.

Example Request

POST http://myintranet.communifire.com/api/content/15151/image

Example Response

Indicator is returned as ResponseData.

```
{
    "IsError": false,
    "ResponseMessage": "ToBePublished",
    "ResponseData": 1
}
```

Please Note The content type that you pass in the header of your request should be **application/octet-stream**.

JavaScript code sample to add a featured image:

```
function submitForm() {

// Make sure you change the baseURL,token and contentID with your own site's values.
 var baseURL = 'https://dev70.communifire.com';
 var token = 'YWRtaW46ZjAzN2NhYzEtOTsssahmMS00ODI5LWIxMWItYzI1ODU3NjJlMzU4';
 var contentID = '8171';

 var targetURL = baseURL + '/api/content/' + contentID + '/image?token=' + token;

 var imgclean = $('#file');
 data = new FormData();
 data.append('file', $('#file')[0].files[0]);

 var imgname = $('input[type=file]').val();
 var size = $('#file')[0].files[0].size;
```

```
 var ext = imgname.substr((imgname.lastIndexOf('.') + 1));
 if (ext == 'jpg' || ext == 'jpeg' || ext == 'png' || ext == 'gif' || ext == 'PNG' || ext == 'JPG' || ext == 'JPEG') {
  $('#Msg').html('Uploading..');
    $.ajax({
   url: targetURL,
   type: "POST",
   data: data,
   enctype: 'image/jpeg',
   processData: false, // tell jQuery not to process the data
   contentType: false // tell jQuery not to set contentType
  }).done(function (data) {
   //console.log(data);
   $('#Msg').html('Success!');
      //debugger;
  });
  return false;
 } //end FILETYPE
 else {
   $('#Msg').html('Error!');
  imgclean.replaceWith(imgclean = imgclean.clone(true));
  alert('Sorry Only you can uplaod JPEG|JPG|PNG|GIF file type ');
 }
}

$('#PostImage').on('click', function (e) {
 e.preventDefault();
 submitForm();
});
```

HTML:

```
<label > Upload Photo : </label>
<input type="file" id="file" name='file'>
<input id="PostImage" value="Post Image"  type="button"/>
<br/>
<span id="Msg"></span>
```
