

Single Sign On

Version 5

Published 6/4/2018 07:21 PM by [Grace Kamau](#) Last updated 4/13/2021 11:34 PM by [Grace Kamau](#)

On the Single Sign On page, you can view and manage SSO settings.

The screenshot shows the Axero Control Panel interface. At the top, there's a navigation bar with links for Control Panel, People, Content, System, Analytics, Exit Control Panel, and Logout. Below this is a sidebar with various system management options like General Settings, Application Settings, Integrations, etc. The main content area has sections for Axero Blog (with posts like 'Top 12 Questions About the Communifire Intranet Software' and 'Does Your Intranet Do This? The Key to Productive Digital Workplaces') and Communifire Support, Services & Add-Ons. A red arrow points from the text above to the 'Single Sign On' option in the System menu dropdown.

This screenshot shows the main navigation bar of the Axero Control Panel. It includes links for People, Content, System, Analytics, Exit Control Panel, and Logout. The 'System' link is currently selected, as indicated by its bolded text.
