Manage Space: Page Builder

Version 11
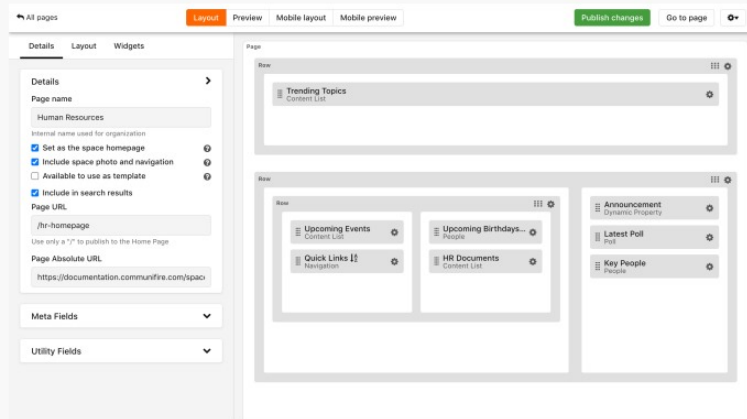

Page Builder is an easy drag and drop tool that allows you to create beautiful content-rich pages throughout your intranet. Page Builder pages are responsive, meaning they are friendly to desktops, tablets, and mobile phones. Page Builder provides pre-built widgets like the ones in the screenshot below for you to get started quickly. You can easily create a page like the one below.

Page Builder was made with user experience at the forefront of its priorities. The builder transforms elements into visual building blocks, allowing anyone to understand and edit the layout and content of their pages without touching a single line of code. There are no limitations as to how widgets can be customized and arranged, making Page Builder the

most flexible tool of its kind available on the market.
