

# Manage Space: System Properties

Version 10

Published 8/16/2019 05:51 PM by [Grace Kamau](#) Last updated 6/18/2021 11:33 PM by [Grace Kamau](#)

System Properties are additional space settings not available in [Manage Space: Settings](#) or [Manage Space: Application Settings](#) . Use System Properties to turn additional features on or off in a space.

The screenshot shows the 'System Properties' interface for a space named 'Human Resources'. At the top, there are navigation links for 'Manage All Spaces' and 'Exit Space Control Panel'. Below the space name, there is a 'System Properties' header with a help icon. A sidebar on the left contains 'View All' and 'Space Properties'. A search bar labeled 'Filter this view' is positioned above a table. The table has three columns: 'Property', 'Value', and 'Edit'. Two rows are visible: 'GhostwritingEnabled' with a value of 'false' and an edit icon, and 'PostAsAnonymousUserEnabled' with a value of 'false' and an edit icon.

Property	Value	Edit
GhostwritingEnabled	false	
PostAsAnonymousUserEnabled	false	

To edit a space System Property:

1. From the space, click **Manage Space > System Properties**.
2. For the System Property, click the edit icon.
3. Update the value.
4. Click **Save**.

System Property	Description
GhostwritingEnabled	Enables or disables the <a href="#">Ghostwrite Content</a> feature in the space.

	After enabling ghostwriting, go to Manage Space > Permissions and select a content type. Check the <b>Select Author</b> permission for the role. Also check the <b>Edit</b> permission to allow the user to update content they ghostwrote.
PostAsAnonymousUserEnabled	Enables or disables <a href="#">Anonymous Discussions</a> in the space.
