

REST API: Users

Version 68

Published 3/13/2011 07:57 AM by [Vivek Thakur](#) Last updated 7/8/2021 04:33 PM by [Grace Kamau](#)

Documentation for the User REST API. The Users REST API includes methods to get user data, create and manage users, and create and manage user roles. You can also search for users, manage user membership, update user points, and more. Use the wiki navigation to the right to explore the User REST API.
