

# Import Page Builder Page

Version 7

Published 1/23/2020 11:57 PM by [Grace Kamau](#) Last updated 6/18/2021 08:42 PM by [Grace Kamau](#)

Note: To enable Page Builder import and export, go to **Control Panel > System > System Properties** and set *EnablePageBuilderPageImportExport* to true.

Import a Page Builder page to restore the page exactly as it was.

1. Click the gear icon > **Page Builder**.
2. Click **Import**.
3. Click **Choose File**.
4. Select the JSON file.

Notes:

- The file must have been exported from the Page Builder pages list. See [Export Page Builder Page](#).
  - The page must be imported to the same site it was exported from. Pages can't be imported to different sites.
5. Click **Upload**.
  6. Update the following details:
    - **Page name**: Administrative name for the page.
    - **Choose a space**: The space to save the page in.
    - **Page URL**: The page URL.
    - **Meta title**: The page title. The title appears in the browser tab.
    - **Meta description**: A description for the page.
  7. Click **Import**.
