

Analytics

Version 24

Published 2/15/2015 02:43 PM by [Bryce Johannes](#) Last updated 1/14/2021 10:03 PM by [Emma-Rose Stuart](#)

[Audience Overview](#)

Audience overview provides visualizations of site traffic data to your community. Data about visits, unique visitors, pages per visit, IP address visits, total visits from members, browser distribution, operating system distribution, and content type distribution are included. You can select the date range and space to view data from.

[Top Content](#)

Top content analytics provides a list of top viewed, commented, liked, and rated content in your intranet. You may download a .csv report.

[Content Statistics](#)

Content statistics provides a visualization of content analytics data in your intranet. You can see how many views, comments, likes, and ratings content has received over time.

[Content Type Distribution](#)

Content type distribution analytics provides a visualization of the number of publications of all the content types (articles, blogs, etc.) for the specified date period.

[Membership Report](#)

The membership report provides information about the roles every member in your community has in the top-level community and all the spaces they are a part of.

[Search Analytics](#)

Search analytics provides an overview of the keywords and tags people search for and the click-through rate.

[Recognition Analytics](#)

Recognition analytics provide visualizations for recognition data. You can see an overview of recognition, drill down into the data by demographic, and download a CSV file of user recognition data.
