

Profanity Filters

Version 8

Published 2/15/2015 08:12 PM by [Bryce Johannes](#) Last updated 5/30/2018 06:57 PM by [Grace Kamau](#)

▫
▫

1. Type the inappropriate word you want to replace
2. Type a colon (:)
3. Type the word or characters you want to replace the inappropriate word. Do not use spaces.

Put each rule on its own separate line.

The words you want to replace must be spelled exactly the same way that you have entered them in order to be censored. You may want to consider entering misspelled versions of profanities or versions that involve symbols, such as using @ in place of "a" and \$ in place of "s".
