

REST API: Get User's Space Roles

Version 15

Published 3/29/2011 08:08 AM by [Vivek Thakur](#) Last updated 2/4/2019 12:40 PM by [Aparna Anand](#)

Get user's space roles

GET /api/spaces/{spaceid}/roles

Find all space roles assigned to user. Valid for Communifire version 5.2 and above.

Method Details

HTTP Method

GET

Response Format

JSON

Requires Authentication?

YES

Product Version

5.2 and above

Required Parameters	How to use	Description
API Key	Used in the request URL: &token=x OR Set in header: request.Headers.Add(Rest-Api-Key, x)	Communifire REST API key for the Communifire portal you are making the call for.
SpaceID	Used in the request URL (see below)	Unique identifier for a particular space.
UserID	Used in the request URL (see below)	ID of the user whose space roles are to be returned.

Example URL to GET: <https://your-community.com/api/spaces/78/roles?userid=90>

Response JSON sample where role JSON object is returned as ResponseData

Here is an example of JSON data returned from the API call. Note that some properties are removed from this sample to make it shorter.

```
{
  "IsError": false,
  "ResponseMessage": "",
  "ResponseData": [
    {
      "RoleID": 980,
      "UserID": 90,
      "SpaceID": 78,
      "RoleName": "Member",
      "Description": "Community members who have joined the space, with normal permissions.",
      "RoleImageFileName": null
    }
  ]
}
```

Please Note Your content type that you pass in the header of your request should be **'application/json'**.
