## How to Create the Sample Menu

1. Add or edit a Page Builder page in **Control Panel > System > Page Builder**
  2. Click the **Widgets** tab
  3. Drag a **Navigation** widget onto the page
  4. Edit the **Navigation** widget
  5. Update the widget **Title**
  6. In **Navigation items**, configure an item:
    - **Title:** Enter the text to display
    - **Item type:** Select Content List
    - **Space:** Select a space
    - **Content Type:** Select a content type
    - **Icon:** The icon will automatically populate after selecting a content type
- Example:

**Configure Widget**

Properties | Template | Advanced | Roles

Title\*  
Quick Links

Navigation Items  Alphabetical sorting

Edit Item | Advanced | Delete | Save

Icon: Title \*  
Articles

Item type: Content List | Space: Human Resource | Content type \*: Article

Save widget for use elsewhere **Save Widget** Cancel

7. Save the navigation item
8. Add more navigation items and configure them
9. Click the **Template** tab.

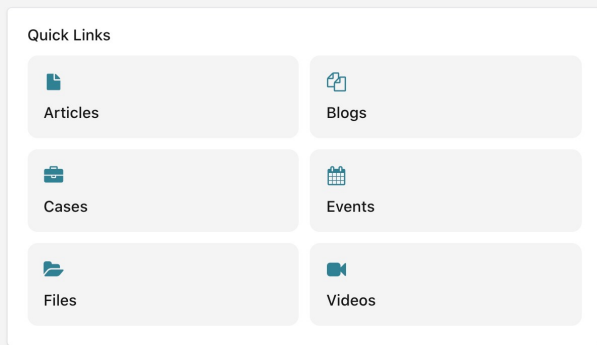

10. Select the **Nav - Icon Blocks (2 Column)** template.
11. Click **Save Widget**
12. Click **Publish changes**.

## Customize the Nav - Icon Blocks (2 Column) Template

### Change Icon Colors

You can change the icon colors in the Nav - Icon Blocks (2 Column) template. Add the following code in **Control Panel > System > CSS Overrides**. Replace #328194 with your desired color.

```
/*Set color of icons in Nav - Icon Blocks (2 Column) template*/
.axero-blocks.axero-lightning-navigation-list .axero-widget-body ul li a .x-icon i {
  color: #328194;
}
```

### Change to 3 or 4 columns

You can customize a Nav - Icon Blocks widget to display 3 or 4 items per row.

1. Go to **Control Panel > System > Page Builder Templates**.
2. Under **Widget Types**, select **Navigation**.
3. Click the **Nav - Icon Blocks (2 Column)** template.
4. In the first line, find `axero-blocks`
5. Add a space and `{{CustomCSSClass}}` after `axero-blocks`.
6. Click **Save Template**.
7. Click **System > CSS Overrides**.
8. Add the following code, at the bottom.

```
/*Nav - Icon Blocks (2 Column) - 3 columns*/
.axero-blocks-three-column .axero-widget-body ul li {
  width: 32% !important;
}

.axero-blocks-three-column .axero-widget-body ul {
  justify-content: space-evenly !important;
}

.axero-blocks-three-column .axero-widget-body ul li:nth-child(3) {
  padding-top: 0;
}

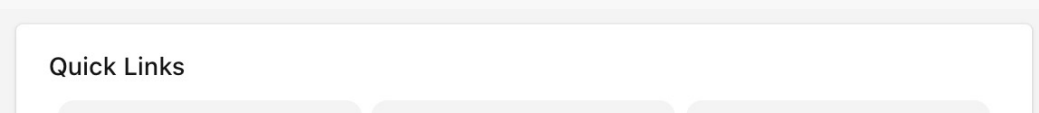

/*Nav - Icon Blocks (2 Column) - 4 columns*/
.axero-blocks-four-column .axero-widget-body ul li {
  width: 24% !important;
}

.axero-blocks-four-column .axero-widget-body ul li:nth-child(3),
.axero-blocks-four-column .axero-widget-body ul li:nth-child(4) {
  padding-top: 0;
}

.axero-blocks-four-column .axero-widget-body ul {
  justify-content: space-evenly !important;
}
```

9. Click **Save CSS Overrides**.
10. Click **System > Page Builder**.
11. Edit the page that contains the Navigation widget.
12. Edit the Navigation widget.
13. Click **Advanced**.
14. In **Custom CSS class**, enter one of the following:
  - `axero-blocks-three-column` - This will make the widget 3 columns.
  - `axero-blocks-four-column` - This will make the widget 4 columns.
15. Save the widget and page.
