

Jitsi Integration Administrator Setup

Version 7

Published 10/15/2020 06:57 AM by [Grace Kamau](#) Last updated 2/21/2024 01:43 PM by [Vladana Garic](#)

When you setup Jitsi integration, people will be able to add a Jitsi meeting link when creating events.

1. In Communifire, go to **Control Panel > System > Integrations**.
2. Click **Add Connected Account**.
3. Click **Jitsi**.
4. Enter a display name. This name will appear in [My Integrations](#) when a user has connected to Jitsi.
5. In **Jitsi Site Url**, enter *https://meet.jit.si/*
6. Set where users can use Jitsi:
 - **Available in top level community:** Users will be able to add Jitsi meeting links when they create events in the top level community.
 - **Available in spaces:** Users will be able to add Jitsi meeting links when they create events in spaces.
7. Click **Save Settings**.

Once settings are saved, users can add Jitsi meetings to events. See [Create Event with](#)
