

# Message List Template

Version 6

Published 10/15/2020 07:19 AM by [Grace Kamau](#) Last updated 5/11/2021 11:38 PM by [Grace Kamau](#)

The Messages List template displays your most recent chat messages. The template is a built-in template and comes with your Communifire site. To see the template in action, set Community Header as the active header in **Control Panel > System > Page Builder > Header**. Then exit the Control Panel and click the chat icon in the header.

Note: Although this template can be selected on any Page Builder page, the template is best used in the [Page Builder: Header](#) . Edit the Community Header in Control Panel > Page Builder > Header to see how to configure a Content List widget when using the Messages List template.
