The Space List template displays spaces in a neat component. This template looks like the [Stacked List Template \(Space List\)](#), but you can select the exact spaces to display, giving you greater control over the resulting list. The template is a built-in template and comes with your Communifire site. To use the template:

1. Add a [Content List Widget](#) on a Page Builder page
2. Edit the widget
3. In the Content Types filter, select Space
4. In the Spaces filter, select the spaces to display
5. Select the Space List template in the Template tab
