Send a test push notification to your device to confirm mobile app push notifications are working.

## Edit Connected Devices Template

1. Go to **Control Panel > System > Page Builder Templates**.
2. In the **Widget Types** menu, select **Connected Devices**.
3. Click **Connected Devices**.
4. If the Connected Devices template doesn't have the following code at the bottom (after `</table>`), copy the following code and paste it at

the bottom of the template.

```
<div class="axero-profile-section-header-row margintop20">
  <input id="ReceiveTestPushNotification" type="button" class="btn" value="{Resources.SendPushNotificationToYourDevices}">
</div>
<script>
  jQuery("#ReceiveTestPushNotification").on("click", function(e) {
    jQuery.post("/api/users/me/devices/all/pushnotification/test", function(response) {
      jQuery.showMessageBar({message:response});
    });
  });
</script>
```

5. Click **Save Template**.
6. Click **Exit Control Panel**.

## Send Test Push Notification

1. Click your name in the header > **Preferences**.
2. If you've logged into the mobile app before, you'll see the **Connected Devices** section. Click **Connected Devices**.
3. Click **Send a test push notification to your devices**.
