Note: If your intranet is private, people will be prompted to log in when they click the link in LinkedIn. Sharing content on LinkedIn does not make the content publicly visible.

The LinkedIn share button allows you to easily share content with your LinkedIn network. Share content in a post that's visible to anyone or to your LinkedIn connections only. You can also share content in a private message. The LinkedIn share button allows your content to reach new audiences and encourages engagement in your intranet.

How to Add the LinkedIn Share Button

1. In CommuniFire, click the gear icon > Control Panel > System > General Settings.
2. Expand the **Header and Footer Scripts** section.
3. In **Enter footer scripts**, add the following code, at the bottom.

```
<script>
//Add LinkedIn button to share modal
$(document).ready(function() {
var linkedInShare = "<script src='https://platform.linkedin.com/in.js' type='text/javascript'><script type='IN/Share' onload='this.data-url=document.URL'><"+"/script>";
$("#ShareModal .axero-social-share-buttons").append(linkedInShare);
});
</script>
```

4. Click **Save System Settings**.

How to Share Content on LinkedIn

1. On the content page, click the gear icon > **Share**.
2. Click the LinkedIn button. A new window will open.
3. Select one of the share options: **Share in a post** or **Send as private message**.
4. Add a message to include in the post.
5. Click **Post**.
