How to Hide Register Button
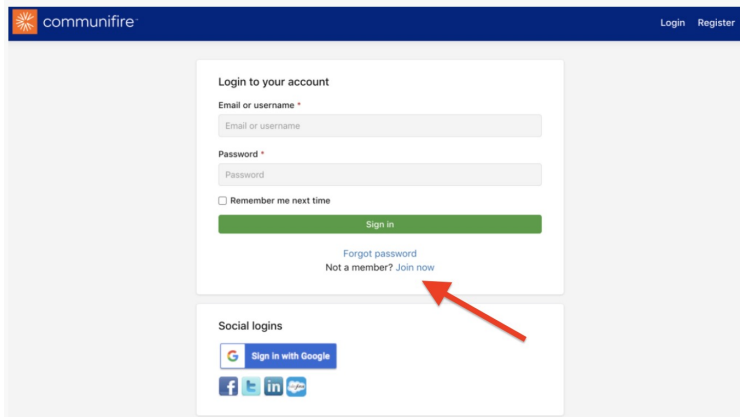

Version 1

Published 4/29/2022 11:48 AM by Atul Ahuja Last updated 4/29/2022 11:48 AM by Atul Ahuja

To enhance the security on your site, you can hide the Register button from public view.

Register button is visible at 2 different locations on your site.

1. On the login screen of a private site

To hide Register button, add the following CSS in your CSS Overrides section

```
.row-fluid.margintop20.text-center>div>div>div {
    display: none;
}
```

2. In the header of a Public Intranet/Community Header

To hide Register button follow the below steps:

Login as an admin and navigate to **Settings - Page builder - Header - Community Header**. Click the Gear icon next to Community Header and Edit

| Community Header | Created: 2/1/2022 |
| Top level community | Updated: 2/3/2022 |

| Global Header with Sub Navigation | Created: 2/1/2022 |
| Top level community | Updated: 2/1/2022 |

Next click the **Gear** icon on Navigation, and expand
