

URL Mapper

Version 4

Published 4/13/2017 10:45 PM by [Matt Trujillo](#) Last updated 5/31/2018 08:40 PM by [Grace Kamau](#)

Using URL Mappers, you can create URL redirects. As an example, if you deleted an article, but you have linked this article in many places, you could create a URL Mapper to redirect the old URL to a new URL. This also helps Google know where to redirect users if you have a public intranet.
