Response JSON sample where role JSON object is returned as ResponseData

Here is an example of JSON data returned from the API call. Note that some properties are removed from this sample to make it shorter.

```
{
  "IsError": false,
  "ResponseMessage": "",
  "ResponseData": {
    "RoleID": 451,
    "UserID": 0,
    "SpaceID": 104,
    "RoleName": "Member",
    "Description": "Community members who have joined the space, with normal permissions."
  }
}
```

Please Note Your content type that you pass in the header of your request should be '**application/json**'.
